Summary

Hey there! I'm Software Developer diving headfirst into the world of coding, with a particular love for React. While my experience might not be measured in decades, I bring a boatload of enthusiasm and a hunger to learn and grow.

In my coding journey, I've embraced challenges with a can-do attitude, and I'm all about soaking up knowledge like a sponge. I might not have a long track record, but what I lack in years, I make up for in dedication and a genuine passion for creating awesome software.

I'm excited to contribute, learn, and collaborate with a team that values curiosity and innovation. Let's embark on this coding adventure together!

Work experience

Front-end developer

Estonian Defence Force / Estonia

Sep 2022 - Jun 2023 (10 m)

Information Technology

As a Front-End Developer, I assisted in the development, testing, and maintenance of web applications using JavaScript (React) and CSS. I actively participated in debugging and troubleshooting frontend issues, meticulously identifying multiple bugs that others might have overlooked. By addressing these issues, I ensured optimal performance and enhanced the overall user experience. Participation in code reviews brings me immense

satisfaction because, by the end of the day, we have a code structure that is not only readable but also follows best practices and promotes maintainability.

Education

University of Tartu (Estonia, Higher education)

computer and systems engineering / Waterfall, Kanban, DevOps (Uncompleted) / Bachelor
2017 - ...

Tallinn High School of Humanities (Estonia, Secondary education)

2005 - 2017

Language skills

Language	Listening	Reading	Communication	Presentation	Writing
English (Language of communication)
